DAILY — Privacy Policy

Last updated: October 30, 2026

1. Overview

DAILY ("we", "our", or "the app") is committed to protecting your privacy. This Privacy Policy explains how we collect, use, and safeguard your information when you use the DAILY application.

2. Information We Collect

We collect the following categories of information:

- **Account information** — your name and email address (provided via Google or Apple sign-in).
- **Task content** — titles, descriptions, dates, priorities, notes, and any photos or file attachments you add to tasks.
- **Location data** — locations you add to tasks and, if you enable location-based reminders or place search, your device's precise location to find nearby places and trigger geofence reminders.
- **Contacts** — if you link a device contact to a task, the selected contact's details (such as name, phone, and email) are stored with that task. We access your contacts only when you open the contact picker.
- **Calendar** — if you enable Calendar Sync, we read your list of calendars and create or update events for your tasks on the calendar you choose. To estimate your available time, DAILY also reads the start and end times of events on the calendars you allow. If you enable event importing, events from the calendars you choose are displayed inside DAILY. Event details stay on your device — they are never uploaded or stored by DAILY. Events you choose to import become DAILY tasks and sync like any other task.
- **App preferences** — settings such as theme, language, sort order, and notification preferences.
- **Subscription status** — your subscription tier and renewal status. Payments are processed by the Apple App Store or Google Play; we do not receive or store your payment card details.
- **Device and usage information** — a device identifier used for multi-device sync and session management, a push notification token (if you enable notifications) used to deliver reminders and alerts to your device, your device's time zone (to send your daily agenda at the right local time), and crash and error reports. Crash reporting is on by default for new accounts, because it is how we find and fix problems; you can turn it off at any time in Settings → Support → Send Crash Reports. Crash and error reports are linked to your account rather than anonymous, so we can follow up with you about a problem you hit, and they include your app version, platform and operating system version, plus the app's recent internal log lines, which can mention the titles of tasks that were open at the time.
- **Support and feedback you send us** — if you submit feedback, a bug report or your sync logs from inside the app, we receive your message and any screenshot you attach, along with your name, email address, device model and app version, so we can reply. A copy is kept with our crash reports whether or not crash reporting is switched on, because you asked us to look at it.

We collect only what is needed to operate the app and the features you choose to use.

3. How We Use Your Information

We use the information we collect to:

- Provide, sync, and operate DAILY across your devices
- Personalize your experience and deliver notifications and reminders
- Provide the optional features you enable (location reminders, calendar sync, and task or list sharing)
- Process subscription status through your app store account
- Improve and develop new features
- Comply with legal obligations

We do not sell your personal information to third parties.

4. Assistant Features

DAILY's optional assistant features process your task information to make suggestions:

- The Priority Assistant orders your tasks using an on-device algorithmic model based on details such as due dates, priority, and dependencies. This runs on your device.
- The Detail Assistant proposes task details from what you enter. When you search for a place or look up business information, the relevant text (and, with your permission, your device's precise location, used to find places near you) is sent to mapping, geocoding, and business-information providers to return results.
- **Connected AI assistants (optional, off by default).** If you turn on AI assistant access and connect an assistant such as Siri, ChatGPT, Claude or Gemini, DAILY sends it the tasks and notes it asks for, including tasks friends have shared with you, and that provider handles them under its own privacy policy. What you tell an assistant is also processed by its provider. So an assistant can tell you what's next, your device sends DAILY the order of your tasks, not how it was worked out. A record of assistant actions, including the earlier values of what changed, is kept on our servers for up to 7 days and on your device for 7 days. You can turn access off at any time in Settings › AI Assistants, which blocks every connected assistant immediately.

DAILY does not use your task content to train AI models. For more about how these features work and their limitations, see our Terms of Service.

5. Data Storage and Retention

Your tasks, preferences, and account data are stored locally on your device and synced to secure cloud infrastructure (provided by Supabase) so your data is available across your devices and can be restored if you reinstall the app. Photos and file attachments you add are kept in secure cloud storage associated with your account.

Data is encrypted in transit, and encrypted at rest on our cloud infrastructure. The copy DAILY keeps on your device so the app works offline relies on your phone's own device encryption rather than a separate password, so keeping a screen lock on your phone matters. We apply industry-standard security measures throughout.

We retain your data for as long as your account is active. You can delete your account and its associated data at any time from Settings, which removes your data from our systems.

6. Sharing of Information

We do not sell your personal information. We share information only:

- **At your direction** — when you share a task or list with another DAILY user, the people you share with can see that content.
- **With AI assistants you connect** — at your direction, as described in Section 4.
- **With service providers** who help us operate the app, under confidentiality obligations — including Supabase (cloud database, authentication, and file storage); the Apple App Store and Google Play, and a subscription-management provider such as RevenueCat, for subscriptions; Google for sign-in; for push notifications, the Expo push service and the platform push gateways — Google Firebase Cloud Messaging (Android) and Apple Push Notification service (iOS) — which receive your device push token to route notifications to your device; and mapping, geocoding, and business-information providers — Foursquare (business details and hours), OpenStreetMap services (Nominatim geocoding and Overpass business lookups), Komoot Photon (place search), MapTiler (map preview images), and your device's platform geocoding service (Apple on iOS, Google on Android), used to convert addresses to map coordinates and back — used for place search, map previews, and optional business-info lookups (your search text, your device's precise location when you search for places near you, and the selected place's name and coordinates are sent to these providers to return results such as nearby places, map images, business hours, phone numbers, and websites).
- **To help us answer you** — when you send feedback, a bug report or sync logs from inside the app, that message and your contact details reach our support mailbox, hosted by Microsoft 365; our internal error summaries are delivered by Gmail.
- **Business details you correct** — if you edit the opening hours or contact details of a place you attach to a task, that correction is saved to a shared place database so other DAILY users looking up the same place see it too. It is stored against the place, never against you, and your tasks are not shared.
- **For legal reasons** — to comply with applicable law or legal process, or to protect the rights, property, or safety of DAILY or its users.

7. Push Notifications

If you enable notifications, we send alerts to your device such as task due-time reminders, overdue-task reminders, a daily agenda summary, and notifications about tasks or lists shared with you. Some notifications (such as the daily agenda) are sent from our servers; to deliver them we share your device push token with the Expo push service and the platform push gateways (Google Firebase Cloud Messaging on Android, Apple Push Notification service on iOS), and we store your device's time zone so the daily summary arrives at the right local time. Notification content is limited to what is needed to show the alert (for example a task title). You can disable notifications at any time through your device settings or in-app notification preferences.

8. Children's Privacy

DAILY is intended only for users who are at least 16 years of age and is not directed to children under 16. We do not knowingly collect personal information from anyone under 16. If we learn that we have collected personal information from a user under 16, we will delete that information and the associated account. If you believe someone under 16 has provided us with personal information, contact us at privacy@leone-labs.com.

9. Your Rights

Depending on your location, you may have the right to:

- Access the personal information we hold about you
- Request correction of inaccurate data
- Request deletion of your data (also available anytime via Settings → delete account)
- Receive a copy of your data in a portable format
- Object to or restrict certain processing, and withdraw consent where processing is based on consent

If you are in the European Economic Area or the United Kingdom, our lawful bases for processing are: performing our contract with you (providing the app), your consent (for optional features such as location and contacts access), and our legitimate interests (operating, securing, and improving the service). You also have the right to lodge a complaint with your local data protection authority.

To exercise these rights, contact us at privacy@leone-labs.com.

10. Changes to This Policy

We may update this Privacy Policy from time to time. We will notify you of significant changes through the app or by email. Continued use of DAILY after changes constitutes your acceptance of the updated policy.

11. Contact

For questions about this Privacy Policy or our data practices, contact us at privacy@leone-labs.com.
